MICRON TECHNOLOGY, INC., ANNOUNCES PATENT CROSS-LICENSE

AGREEMENT WITH TEXAS INSTRUMENTS, INC.

Boise, Idaho, March 9, 1994--Micron Technology, Inc., today announced that it has entered into a patent cross-licensing agreement with Texas Instruments, Inc., of Dallas, Texas, involving the semiconductor patents of the two companies and their subsidiaries. As a result of this agreement, the various patent lawsuits between Micron Semiconductor, Inc., and Texas Instruments (TI) in Idaho, Texas, and Delaware have been settled.

Similar to a prior cross-license agreement between the parties which expired in 1992, Micron will pay ongoing royalties to TI based on sales of DRAMs and other semiconductor devices. The company has accrued a sufficient amount to pay the royalties related to sales for periods from expiration of the previous cross-license to the date of settlement.

Micron Technology, Inc., based in Boise, Idaho, is a holding company whose common stock is traded on the New York Stock Exchnage, Inc. (NYSE) under the symbol MU. The company's primary subsidiary, Micron Semiconductor, Inc., manufactures and market DRAMs, fast SRAMs, and other semiconductor products.
